

This shape is a "geodesic dome", and is all over the US as different attractions like:

Like this record of the Fuller Dome Home in Carbondale, IL.

I've found the coolest things under the HABS/HAER/HALS umbrella:

Architects, engineers, and historians will visit iconic/remarkable places around the country and document their significance, whether it is culturally significant, architecturally significant, etc. etc.

collection that is a partnership between the

HABS/HAER/HALS is an ongoing

The image shows the front cover of a book. The background is a photograph of a large, multi-story, light-colored building with many windows, set against a blue sky with some clouds. The building appears to be a historical structure. Overlaid on the image is the title 'HABS HAER HALS' in large, bold, white, sans-serif capital letters. Below the title, the three survey names are listed in smaller, white, sans-serif capital letters: 'HISTORIC AMERICAN BUILDINGS SURVEY', 'HISTORIC AMERICAN ENGINEERING RECORD', and 'HISTORIC AMERICAN LANDSCAPES SURVEY'. The text is arranged in a way that it is read from bottom to top.
